LASER PRINTING SERVICES

Our UK production facility specialises in eco-friendly screen-printing, making sure your brand stands out from the crowd in high resolution, crisp, vibrant print.

We also offer laser printing, translating your brand from two dimensions to three with fine detail engraving that sets you apart from the competition.

Get in touch now to discuss the latest options for laser printing services.

ABOUT US

Southwesterly specialises in manufacturing and printing promotional products for beverage companies, food producers, attractions and hospitality venues.

Our aim is to give your brand the exposure it deserves, without compromising on quality, durability or sustainability. With a dedicated in-house printing facility and experienced printers, your order could be with you in just a few days.

We work hard to ensure our products have minimal impact on the environment, by using FSC certified wood and natural cotton canvas across our range, so you can be confident that your supply chain is ethical and fair. Choose from our broad range of products or talk to us about creating a bespoke outdoor product unique to your company.

(Pick up individual deck chairs, personalised or plain, from our online retail store at deckchairshop.co.uk – ideal gifts or just treat yourself to a traditional cotton canvas deckchair).

Southwesterly's sister company, GoJute International, is Europe's leading manufacturer of branded jute bags and cotton totes. See GoJuteInternational.com to shop the range and request a sample bag.
